Sports & Recreation Structures

ARCHITECTURAL SPORT STRUCTURES

We love sport. That's why we're passionate about utilising ambitious lightweight architecture to create iconic structures that help create sporting legacies.

Our "Fabric Architecture" projects are our bespoke (custom) tensile fabric structure projects.

Bespoke architectural sporting structures are perfectly designed for stadiums, state sporting centres, outdoor pools, car park structures, entrances and walkway covers, as well as cultural and sporting entertainment venues.

We offer turnkey design & construction contracts to ensure we meet your program on time and on budget. Quality, safety and customer satisfaction are our top priorities.

Adelaide Oval Redevelopment (2013)
Adelaide, Australia

SPORTS & RECREATION FABRIC STRUCTURES

Our product-based range of sports & recreation 'fabric structures' utilise either aluminium or structural steel framing options to create an enclosed facility to suit your needs.

Sports fabric structures are perfect for:

- Gymnasiums
- Indoor tennis, netball & multisport venues
- Aquatic centres & pool enclosures
- Equestrian activities
- Cultural & sporting entertainment venues

We have a range of optional extras to customise each fabric structure to suit the needs and gaming requirements of each sport. Accessories such as lighting, air conditioning, internal liners (acoustic control) and retractable walling systems are available.

Our team includes designers, engineers, architects, fabricators, fabric suppliers, builders and project managers.
