

## Emu Park

The Emu Park Foreshore Playground canopy in Yeppoon, Queensland, features a large architectural shade canopy covering a children's playground. The structure has a fun, unique shape, designed to look like a bug, and uses thick walled steel members as the project location is within a cyclone zone.

Serge Ferrari 702S2 PVC was the chosen fabric and provides adequate shade and weather protection for the children playing below. Fabritecture was contracted for the supply only of the structure.

**Location:** Yeppoon, Queensland Australia (2020)

**Building Type:** Outdoor architectural shade structure

**Size:** 550m<sup>2</sup>

**Fabric:** Serge Ferrari 702S2 PVC

**Architect:** Alderson and Associates Landscape Architects
